

Resources for Nurse Educators

Steppingstones wishes to work with nurse educators to make their nursing education and professional development programs more effective and successful. We are willing to share our experiences and non-individual results from the data collected at the Learning Nurse.

Here are some of the ways we can assist nurse educators. Steppingstones can make available our tests and e-Learning courses for installation on your own Learning Management Systems (LMS). We could also set up a separate website to host tests / quizzes and e-Learning courses for your nurses only. Full tracking and reporting will be included.

We can assist you to develop comprehensive competency profiles, competency self-assessment tools, learning plans / records and software to track and manage continuing education programs. We also can do training needs assessments and evaluations of programs.

Finally, we have the software tools and capabilities to develop custom assessment / learning quizzes and rapid e-Learning materials to meet your educational / training requirements. Contact us for details and cost estimates.

If you would like more information, or have some specific requirements, please e-mail or give me a call.
